

iASK 2019-2020 Workshop Series of Human 2.0 Research Group

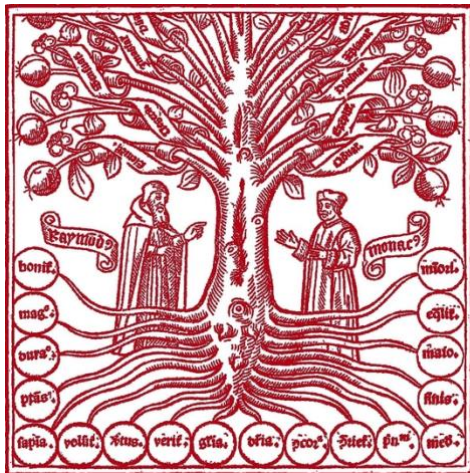

Technoartescience/Technosocioeconomy

A Multinarrative Approach to Digital Culture

Raimundus Lullus (Ramón Llull)

God and man, nature, art and science
 The totality of knowledge, represented
 by a tree

How to combine elements of
 thinking, elements of language?

Arbor Scientiae (1295)

PRIMA FIGURA.

Ars magna generalis ultima (1305)

Mission statement: ‘Digital transformation’ is the expression that has been formulated to describe our age, however, we are starting to see that it is the human being that should be in the forefront of current development trends; no successful industrial revolution will be accomplished without bearing in mind basic human values, such as equality and responsibility.

The goal of this iASK Workshop Series is to shed some light on the frontiers of human and machine knowledge, and to initiate an international discourse on the intersections of humanity –and the Humanities– in the digitally driven revolution.

Program

10.00 – 13.00 Future of Society and Humanism

Guest and Keynote: Wolfgang Hofkirchner (Professor emeritus for technology assessment at the Faculty of Informatics, Vienna University of Technology and director at the Institute for a Global Sustainable Information Society): *The concept of the global citizen - a possible third step in becoming truly human/e*

Contribution: György Csepeli (professor emeritus, ELTE): *Artificial Intelligence and Beyond – the need for Preserving Human Autonomy and Responsibility*

Comment: Zoltan Lantos (iASK research fellow): *The Heart of the Heart is Infinite – we have a long Journey Ahead of us*

Roundtable

13.00 – 14.00 Lunch

14.00 – 16.00 Discussion

16.00 – 17.00 Formulation of Joint Research Questions

Date: 11 February 2020, 10.00 – 17.00

Venue: Bibó Room, Institute of Advanced Studies Kőszeg, H-9730 Kőszeg, Chernel utca 14. 2nd floor
